

## PROOF OF DI PLATFORM

Digital identification is provide real user identity with securities which is secure your wallet and find the real user interface our DI platform is world's first multi Blockchain user identity network digital identity is very necessary for all Exchanges, blockchains, wallets and all crypto community Digital identity secure users and exchanges from scams & hacks DI is very necessary before done any transaction, DI network provides real User identity to any exchange or any other crypto transaction on blockchain.

## HOW DI WORK

Before done any transaction on centralized Exchanges, wallets and Blockchains acceptance

Need with DI network

1. Secure transaction between exchange to user wallet, user wallet to exchange wallet,  
user to user wallet, and Blockchain acceptance service to user wallet

2. DI platform provide real user interface

3. Doing Best to accept blockchain in All over the world

3 STOP MONEY LUNDRING which happen with Blockchain

4 Record off all transaction for taxable amount to government

5 Make Globally Acceptable Solution for all blockchain

6 reduce risk factors to zero from blockchain

7 increase believe in blockchain technology worldwide

7. Record centralized and decentralized transaction

8 100% Reduce Criminal Activities in Blockchain transaction

9 100% Stop crypto hacking attack if we find the real address with real user Before any transaction

ALL BLOCKCHAIN OF THE WORLD NEED USER KYC ON OUR PLATFORME BEFORE ANY WITHDRWAL OR  
RECIEVE TRANSECTION

ALL EXCHANGE OF THE WORLD NEED USER KYC Mandatory ON OUR PLATFORME BEFORE DOING ANY WITHDRWAL AND RECIVE IN ANY COIN OR TOKEN IN WALLET

ALL CRYPTO WALLET NEED USER KYC ON OUR PLATFORME

## WHY NEED DI

- 1 NO Traceability in blockchain transition
2. No records for government
3. No records for all decentralized transaction
4. Money laundering problems
5. Cyber criminal attacking on crypto currency exchanges
6. Blockchain not provide real user identity
3. Blockchain acceptance problems worldwide
4. Solve real world's problem to accept blockchain technology
5. Regulation according to all country on single platform for blockchain
6. Blockchain Technology Likely Won't Reach Mainstream Adoption
- 7 Need to increase % OF Blockchain Believer Population 20%-30% worldwide in next 2 year Due to All over worlds only .71% (50 million) out of 7 billion people worldwide using Blockchain technology according to Blockchain researcher
